

BOURGEDIS ROUNDED 1 OF 79 FONTS.BARNBROOK.NET

Bourgeois Rounded is a variant of Bourgeois, the popular geometric sans. Rounded still retains the same fresh modernity and efficiency of the Sans, but is slightly more sleek, a little more stylised in its voice.

ABOUT

Bourgeois Rounded is built upon the framework of Bourgeois, our popular geometric type family. As with the sans-serif Bourgeois Rounded letterforms are contemporary in look and feel. Echoing late 20th century modernism in style, Rounded's overall look is clean and sleek, more ephemeral and dynamic than Bourgeois's pared-down asceticism.

The Rounded's place in the history of font is a complex one. Being lauded for their legible characteristics and also at the same time their fashionable qualities, looking ultramodern and nostalgic, readable and highly stylised, authoritative and playful. Bourgeois Rounded and Rounded Condensed when combined, offer 24 styles suited for text of all kinds and sizes. Both are particularly good for short pieces of text requiring a sense of urgency or playfulness.

Foreigners were hard to catch, on Nepenthe. They came and went in such breathless succession. Of the permanent residents only the Duchess, always of High Church leanings, had of late yielded to his blandishments. She was fairly hooked. Madame Steynlin, a lady of Dutch extraction whose hats were proverbial, was uncompromisingly Lutheran. The men were past redemption, all save the Commissioner who, however, was under bad influences and an incurable wobbler, anyhow.

Legends galore, often contradictory to this account and to one another, have clustered round his name, as was inevitable.

He is supposed to have preached in Asia Minor; to have died as a young man, in his convent; to have become a hermit, a cobbler, a bishop (of Nicomedia), a eunuch, a politician. Two volumes of mediocre sermons in the Byzantine tongue have been ascribed to him. These and other crudities may be dismissed as apocryphal. Even

He lays it down that then $\,$ pagan inhabitants of the island, desirous of sharing in the benefits of Christianity which had already reached the mainland but left untouched their lonely rock, sent a missive to the bishop containing the two words DO DEKANUS: give us a deacon! The grammar is at fault, he explains, because of their rudimentary knowledge of the Latin tongue; they had only learnt, hitherto, the first person singular and the nominative case—so he says; and then proceeds to demonstrate, with unanswerable $arguments, that {\it Greek was the spoken language of Nepenthe at this period.} \\$ scholars have been swayed by his specious logic to abandon the older and sounder

Two volumes of mediocre sermons in the Byzantine tongue have been ascribed to him. These and other crudities may be dismissed as apocryphal. Even his name has given rise to controversy, although its origin from the Greek word DODEKA, signifying twelve and alluding to the twelve morsels into which his body was supersti tiously divided, is as self-evident as well can be. Thus a worthy young canon of the church of Nepenthe, Giocinto Mellina, who has lately written a life of Saint Eulalia, the local patroness of sailors—her festiva occurs twelve days after that of Saint Dodekanus—takes occasion, in this otherwise commendable nam phlet, to scof at the old-established derivation of the name and to propose an alternative etymology. He lays it down that then pagan inhabitants of the island, desirous of sharing in the benefits of Christianity which had already reached the mainland but left untouched their lonely rock, sent a missive to the bishop containing the two words DO DEKANUS: give us a deacon! The grammar is at fault, he explains, because of their rudimentary knowledge of the Latin tangue; they had only learnt, hitherta, the first person singular and the nominative case—so he says; and then proceeds to demonstrate, with unanswerable arguments that Greek was the spoken language of Nepenthe at this period. Several schalars have been swayed by his specious logic to abandon the older and sounder interpretation. There are yet ather conjectures about the word Dodekanus, all more or less fanciful....If the Cratalophobol had not devoured the missionary Dodekanus, we should assuredly never have heard of Monsignor Perrelli, the learned and genial historian of Nepenthe. It was that story, he expressly tells us, which inflamed him, a mere visitor to the place, with a desire to know more about the island. A people like the Nepentheans, who could cherish in their hearts a tale of such beouty, must be worthy, he concluded, "of the clasest and most sympathetic scrutiny." Thus, one thing leading to another, as always happens where local researches are concerned, he soon found himself collecting other legends, traditions, historical data, statistics of agriculture and natural produc $tions, and so forth. The proud title 'Commissioner' caused the bishop to pay particular attention to the other of the two individuals in question. He beheld a stumpy and pompous-looking personage, flushed in the face, with a moth-eaten grey beard and shifty grey eyes, clothed in a flannel shirt, tweed knickerbockers, brown stockings, white spats and shoes. Such was the Commissioner's invariable get-up, save that in winter he wore a cap instead of a panama.

He is supposed to have preached in Asia Minor; to have died as a young man, in his convent; to have become a hermit, a cobbler, a bishop (of Nicomedia), a eunuch, a politician. Two volumes of mediocre sermons in the Byzantine tongue have been ascribed to him. These and other crudities may be dismissed as apocryphal. Even his name has given rise to controversy, although its origin from the Greek word DODEKA, signifying twelve and alluding to the twelve morsels into which his body was superstitiously divided, is as self-evident as well can be. Thus a worthy young canon of the church of Nepenthe, Giacinto Mellino, who has lately written a life of Saint Eulalia, the local patroness of sailors—her festival occurs twelve days after that of Saint ${\bf Dodek anus-takes\,occasion, in\,this\,otherwise\,commendable\,pamphlet, to\,scoff}$ at the old-established derivation of the name and to propose an alternative $etymology. \, He \, lays \, it \, down \, that \, then \, pagan \, in habitants \, of \, the \, is land, \, desirous \, of \, and \, it is larger and \, it is l$ sharing in the benefits of Christianity which had already reached the mainland but left untouched their lonely rock, sent a missive to the bishop containing the two words DO DEKANUS: give us a deacon! Several scholars have been swayed by his specious logic to abandon the older and sounder interpretation. There are yet other conjectures about the word Dodekanus, all more or less fanciful. The grammar is at fault, he explain because of their rudimentary knowledge of the Latin tongue; they had only learnt, hitherto, the first person singular and the nominative case—so he says; and then proceeds to demonstrate, with unanswer able arguments, that Greek was the spoken language of Nepenthe at this period. Several scholars have been swayed by his specious logic to abandon the older and sounder interpretation. There are yet other conjectures about the word Dodekanus, all more or less fan the Crotalophoboi had not devoured the missionary Dodekanus, we
