

WINGBAT
OVER 90 AVIATION
DINGBATS

tg wingbat family

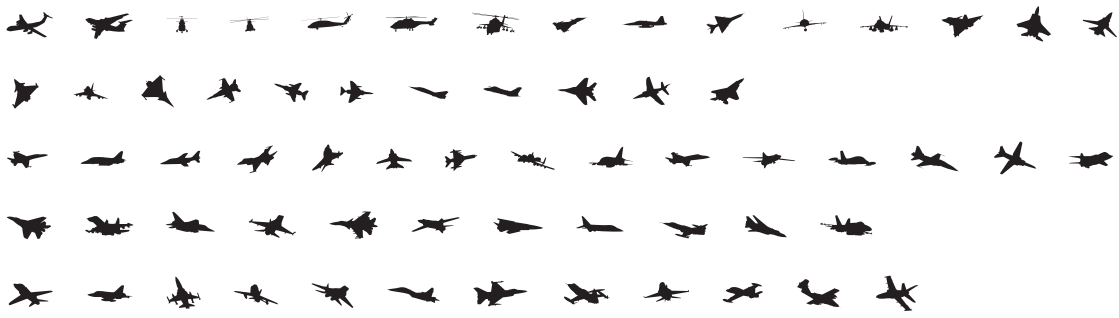

tg wingbat one

tg wingbat two

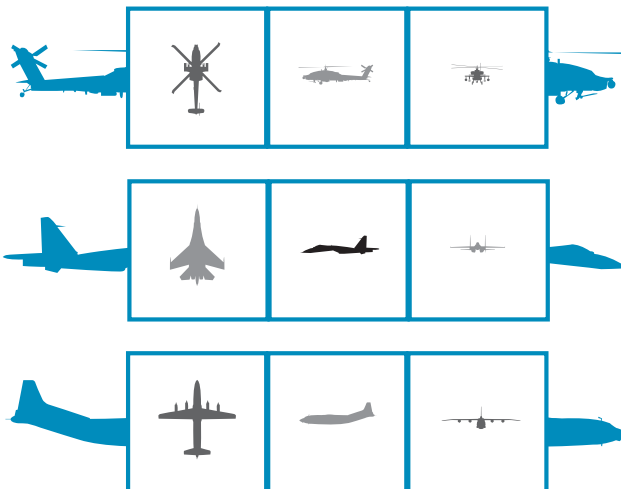

tg wingbat flight

The Tg Wingbat basically contains two families of dingbats.
The first group named one & two are blueprint style layouts of planes and helicopters grouped by series of three. The initial view is taken from above, then lateraly and finally from the front. In the second family there is a series of views of planes in flight, these are organised by type of craft.
